UPDATE ON COVID 19 : 002/2020

Renaissance is closely monitoring the COVID 19 situation through local authorities in Oman, UAE and World Health Organization (WHO) updates. We remain committed to running our operations smoothly so that we can always offer our clients the best service solutions.

In order to reduce the footfall in our Head office in Muscat, Oman, we are implementing two things:

1. Effective of Tuesday, 24th of March 2020, we will have only c. 30% of our workforce only coming to office. Rest of the employees will be working from home. We are fully geared up with all information technology tools to engage remotely with our workforce.
2. We are also restricting visitors to our office, unless they are very critical to support our operations. This is in place from Monday, 23rd March 2020.

Our operational teams are doing an outstanding job to sustain crucial services to the hospitals, oil & gas fields and other vital institutions, so they may remain fully operational, focused on their core roles.

Our Business Resilience Team is currently meeting daily and reviewing the current situation very closely.

At this stage, we have no concerns to report and we are in full control of the situation.
